Information Disclosure Statement

The information disclosure statement (IDS) submitted on 04/10/06 and 05/10/06 were filed before the first action of the merits of the requested RCE. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement has been considered by the examiner.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: While the prior art teaches a method for producing a non-warped semiconductor die; however, the prior art of record either singularly or in combination failed to anticipate or render obvious the limitations of applying a stress-balancing layer to a thinned wafer to balance stress caused by a front passivation layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims #1 through 74 are allowed.

Claim #1

- Applying a stress-balancing layer to said wafer substantially balancing the stress caused by the front side passivation layer.

Claim #28

- Reducing a cross-section of said semiconductor die by thinning said semiconductor die applying a stress-balancing layer to said wafer.

Claim #33

- Applying a stress-balancing layer to said wafer substantially balancing the stress caused by the front side passivation layer.

Claim # 59

- Applying a rigid stress-balancing layer to a portion of said thinned back side. said stress-balancing layer comprising a material markable with indicia.

Claim #60

- Applying a rigid stress-balancing laver to a portion of said thinned back side.

Claim #65

- Applying a rigid stress-balancing layer to said thinned back side of the semiconductive material of the wafer under conditions which apply a back side stress generally equivalent to said front side stress of the front side passivation laver upon restoration to conditions of said semiconductor die use.
